INTRODUCTION

My research focuses on sequential decision-making, including bandit algorithms, partial monitoring games, and reinforcement learning with applications in large language model routing (LLM routing) and recommender systems. I have a strong foundation in theoretical machine learning and foundational models, complemented by hands-on experience in embedded C, C++, Python, Java, MATLAB.

EDUCATION

University of Arizona, USA *Aug 2022 - present*
PhD in Computer Science
Overall GPA: 3.67/4.0

University of Moratuwa, Sri Lanka *Feb 2014 - Jan 2018*
B.S.(Hons) in Engineering
Department Electronic and Telecommunication Engineering
Overall GPA: 3.81/4.2

PROFESSIONAL EXPERIENCE

Amazon May 2025 - August 2025
Applied Scientist Intern *Amazon, New York*
Campaign intent detection using large language models and using the intents to recommend key-words for advertisers to create optimal campaigns.

Thales Digital Identity & Security May 2020 - May 2022
Embedded Software Engineer *Thales DIS, Singapore*
Development of Smart card OS for Telco, Secure Element, Transport and Banking applications to be deployed on micro controller chips.

London Stock Exchange Group Feb 2018 - Feb 2020
Hardware Acceleration Engineer *LSEG Technology, Sri Lanka*
Acceleration of time critical modules in exchange and trading platforms using FPGAs.

Temasek Laboratory, Nanyang Technological University Aug 2016 - Dec 2016
Research Assistant *NTU, Singapore*
Blind channel equalization of OQPSK signals under strong co-channel interference using higher order statistics.

TEACHING & VOLUNTEERING ROLES

- I have been a reviewer in top-tier conferences like ICML, Neurips, ICLR and AISTATS.
- Teaching Assistant
  - Spring 2025: CSC 445 Algorithms
  - Fall 2025: CSC 477/577 Computer vision

JOURNALS & CONFERENCES

† indicates equal contribution. (J) indicates journal paper.

- **ICLR'27**(***under review***): ***Efficient contextual partial monitoring with general function approximation.***
  Kapilan Balagopalan, Hao Qin, Kwang-Sung Jun, Chicheng Zhang. International Conference on Learning Representations. 2027.
- **ICLR'27**(***under review***): ***Efficient Algorithms for Contextual Apple Tasting with Log-Loss.***
  Byeongwoo An†, **Kapilan Balagopalan**†, Hyowon Wi†, Sehwa Jeong, Jiun Jeong, Kyoungseok Jang, Noseong Park, Gi-Soo Kim, Kwang-Sung Jun. International Conference on Learning Representations. 2027.
- **ICML'26**: ***Fixed Budget is No Harder Than Fixed Confidence in Best-Arm Identification.***
  Kapilan Balagopalan†, Yinan Li†, Yao Zhao, Tuan Nguyen, Anton Daitche, Houssam Nassif, Kwang-Sung Jun. International Conference on Machine Learning. 2026.
- **ICML'25**: ***Fixing the Loose Brake: Exponential Tail Bounds for Stopping Time in Best Arm Identification.***
  Kapilan Balagopalan†, Tuan Nguyen†, Yao Zhao†, Kwang-Sung Jun. International Conference on Machine Learning. 2025.
- **AISTATS'25**: ***Minimum Empirical Divergence for Sub-Gaussian Linear Bandits.***
  Kapilan Balagopalan, Kwang-Sung Jun. International Conference on Artificial Intelligence and Statistics. 2025.
- **CSSP'18**(J): ***Blind Equalization in the Presence of Co-channel Interference Based on Higher-Order Statistics.***
  Guohua Wang, **Kapilan Balagopalan**, Sirajudeen Gulam Razul, Shang-Kee Ting, Chong Meng Samson See. Circuits Syst Signal Process 37, 4150–4161, 2018.
